

## October Newsletter

This is our first newsletter to give you feedback on what the Lord has done this past month. We hope that you would find this letter effective in keeping you updated and informed.

First of all we would like to give you our most humble thanks for all your prayers and support. It is certainly the most important part in mobilizing any project we would hope to launch and with the Grace of God we accomplish more than expected.

Everyday is a journey with the potential for miracles and wonders:

What a beautiful month October has been with all the earth shouting out the Glory of God. Benjie went to The Democratic Republic of the Congo and it's Rainforests (see our Gallery for more great pictures) and is al fanatic about the absolute beauty of the nature and landscapes – what a fantastic time they had. They drove about 500 km in 5 days to some remote villages, where there haven't been any missionaries for years. The people have got churches, but no bibles, therefore the Word is being spread my mouth

Oh, but their reactions were amazing when Benjie shared the gospel to groups of 100+ people... what a hunger they have to hear more. Despite the sad stories of war and violence, one should notice their intense faith... as it is written in 1 Cor 15:19 "If in Christ we have hope in this life only, we are of all people most to be pitied." Read more about a great testimony in the Testimonies tab)

Benjie and Wilhelm Els, a missionary friend which has made major impact in various countries, also went to visit one of the churches in Mbuji-Mayi where Benjie and 4 other missionaries went to 4 years earlier (another great testimony). They presented Farming God's way and witnessed the fulfilment of the prophetic word that was given four years back (read this in the testimony). Farming God's Way ([link](#)) is a programme where farming technologies are being taught, so people can be self sustainable. It has already made a huge impact in Africa. This Church has embraced the idea in such a way that they want to take it to other parts of the Congo.
